July 9, 2008

Dear Save Our Sewers and Water:

The women of the Save the Water Campaign of the Women's International League for Peace and Freedom sends its congratulations to you in your successful petition drive to save your sewer system. Your hard work to educate your community and gather the necessary signatures is to be commended. You have reached the first step in a process that will challenge your patience and your minds. We know you are up to meeting this challenge by the good work done in obtaining in excess of the needed signatures before your deadline.

At our recent National Congress in Iowa, it was our pleasure to let people from around the country know of your struggle in Akron. The overwhelming sentiment we heard was that your efforts must be successful. Public utilities must remain in the hands of the people, not corporations. Please know that you have many sisters in this struggle and though they cannot be with you in Akron, they are with you in spirit.

We wish you great success in your continuing work to show your government that the people will decide the ownership of their assets!

In solidarity,  
Save the Water Team, WILPF
