CREATING AN INTEREST- AND DEBT-FREE MONEY SYSTEM

And Creating Jobs and Eliminating the Debt while We're At It!

Stephen Zarlenga
Director, American Monetary Institute

Monday, April 11, 7:00 PM
Cleveland Friends Meeting / Peace House
10916 Magnolia Ave., University Circle, Cleveland

Zarlenga will discuss how the public can regain control of our money system.

Our money system is run by financial institutions, not *We the People*. The vast majority of money in our society is created as debt (via loans) by banks and other financial institutions that must be repaid with interest when it could be created debt- and interest-free by the government as stipulated in the Constitution. A federal bill introduced by Rep. Dennis Kucinich would "democratize" our money system and in the process reduce US debt and create jobs (re)building our nation's infrastructure. Zarlenga will discuss the status of the Kucinich bill in the new Congress and what we can do to help raise awareness about it.

Text of Kucinich bill in last Congress: <http://www.monetary.org/hr6550bill.pdf>
